

23" ultra-slim design LCD monitor

ultra-slim design
 starlight touch controls
 eco-friendly
 dynamic contrast ratio

This LCD monitor is absolutely stunning for a reason. You'll be amazed at its beautiful ToC™ design and crystal clear neck with ultra-slim dimensions. And starlight touch controls add to its sophisticated look. It also reduces your carbon footprint and it's Energy Star rated so it uses 50% less energy. Plus with a dynamic contrast ratio of 50000:1 and 2ms response time you enjoy sharper images that are blur-free. This SAMSUNG monitor gives you something beautiful to stare at, whether it's on or off.

ultra-slim design

Our ultra-slim monitor is a stunning addition to any room. It's finely crafted from its crystal clear neck to its clean, black silhouette. The high-gloss bezel changes colour with the room's light. Turn it on, and the on/off button disappears. And with a screen depth of only 30mm, it can be placed anywhere. Plus, ToC™ adds a touch of unique style to its surroundings with a hint of colour infused into the bezel.

eco-friendly

Our monitors are created with a unique manufacturing process and are VOC-Free, designed to reduce your carbon footprint. Energy Star rated, they use 50% less power. That reduces the amount of CO2 emitted into the atmosphere. It's one piece of your computer equipment that can be used for generations to come.

starlight touch controls

Apply a gentle touch to any of the buttons and they light up. After a few moments of inactivity they disappear for a clean look.

dynamic contrast ratio

The contrast between light and dark colours on the screen is what makes images stand out. The bigger the difference between light and dark images, the more vibrant images will appear. With amazing dynamic contrast ratios of 50000:1 you'll enjoy sharper image quality that's sure to catch your eye.

2ms response time

Response time refers to how long it takes pixels to turn from completely white to black and back again. The lower the milliseconds (ms), the faster the response time is. A fast 2ms response time virtually eliminates any blurring, making this monitor perfect for enjoying video games and all of your digital entertainment.

Full HD resolution

1920 x 1080 full high definition resolution delivers sharp, crystal clear images with vivid colour.

Display	Screen Size	23 Watts
